Accesibilidad

Es el grado en el que todas las personas pueden utilizar un objeto, visitar un lugar o acceder a un servicio, independiente de sus capacidades físicas, cognitivas y técnicas.

Relacionado a Internet se refiere a qué tan apto se encuentra el contenido de un sitio para ser interpretado por todos los usuarios, independientemente de sus limitaciones fisiológicas y tecnológicas.

Usabilidad

Facilidad con que las personas pueden utilizar una herramienta u objeto fabricado por otras personas con el fin de alcanzar un objetivo en concreto.

En el diseño Web, se refiere exclusivamente a que tan beneficiosa es la experiencia de uso de una interfaz gráfica interactiva.

Graceful Degradation

La degradación elegante es la propiedad que habilita a un sistema a seguir funcionando luego de haber ocurrido un error.

El decrecimiento del sistema es proporcional a la gravedad del error.

Esta no es una propiedad exclusiva de las máquinas sino también aplicada a las interfaces de usuarios y su capacidad para tolerar los errores.

Javascript no obstructivo

Formato y navegación móvil para templates comunes

Contenido en ventanas modales para móviles

Progressive Enhancement

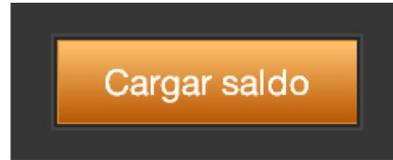

La mejora progresiva es una estrategia del diseño web que hace hincapié en la accesibilidad de los sitios web, su semántica HTML/CSS y las tecnologías de secuencias de comandos.

El objetivo es ir mejorando el aspecto y la funcionalidad de acuerdo a las capacidades de los nuevos navegadores.

MATT PORTERFIELD

ABOUT MATT

Matt Porterfield is a 35-year-old actor and voice actor from Baltimore, MD. He has written, produced, and starred in the award-winning feature film *THE GREAT DISCONTENT*, which is currently in production. He has also written and produced the feature film *THE GREAT DISCONTENT*, which is currently in production. He has also written and produced the feature film *THE GREAT DISCONTENT*, which is currently in production.

INTRODUCTION

We saw Matt's first video a year ago and immediately admired Matt's ability to capture and honestly, but gracefully, bring the humanity in each of the characters. The work reveals the beauty and grace of being human and challenges us, the viewers, to accept truth, not avoid it. I used to be a director, I used to produce at Sundance in a month and we couldn't be more excited for you to get to a broader public and it's so good. Really, who Matt was in 15, we met up with him at the award dinner from his laptop more about his path into filmmaking, his current pursuits, and what the future might hold. Whether you're an aspiring filmmaker or not, Matt's interview is sure to inspire you to continue pursuing what you love.

"I'm a tactile learner, so I wasn't until I got my hands on the tools that I became actualized for me. I thought, 'I really like this,' but it wasn't until later that I realized it had the potential to combine all the things that interested me."

Modernizr is a JavaScript library that detects HTML5 and CSS3 features in the user's browser.

Why use Modernizr?

Taking advantage of cool new web technologies is great fun, until you have to support browsers that lag behind. Modernizr makes it easy for you to write conditional JavaScript and CSS to handle each situation, whether a browser supports a feature or not. It's perfect for doing progressive enhancement easily.

How it works

Modernizr runs quickly on page load to detect features; it then creates a JavaScript object with the results, and adds classes to the `html` element for you to key your CSS on. Modernizr supports dozens of tests, and optionally includes [YepNope.js](#) for conditional loading of external `.js` and `.css` resources.

Check out the [full list of features](#) that Modernizr detects, or learn more about [conditional resource loading with Modernizr](#).

“An indispensable tool.”

— Bruce Bowman, *Adobe BrowserLab Product Manager*

Download Modernizr 2.6.2

Use the commented, uncompressed Development version to develop with and learn from.

[View documentation](#)

Then, dive into the Production build tool and pick just the tests you need!

Get started with Modernizr

While Modernizr gives you finer control over the experience through JavaScript-driven feature detection, it is important to continue to use best practices throughout your development process. Use progressive enhancement wherever you can, and don't sacrifice accessibility for convenience or performance.

Spoofs & Mimics User-Agent strings.

Ever needed to quickly switch between user-agent strings on the fly? Developing a site that needs to work on both mobile browsers and desktop browsers? Sick of some archaic site blocking you because you're not using Netscape 4?

The User-Agent Switcher for Chrome is the answer. With this extension, you can quickly and easily switch between user-agent strings. Also, you can set up specific URLs that you want to spoof every time.

This version is new and improved, and not only modifies the user-agent sent with the HTTP requests, but also the javascript objects in the page.

NOTE: if Google sites / YouTube have problems after using a mobile user-agent, you may need to switch the user-agent back to Chrome *and* clear your cookies for the sites to treat the browser normally again.

Twittear

Diseño web adaptativo es la capacidad que tiene un sitio web para ser visualizado correctamente independientemente del dispositivo desde donde se accede. No se trata exclusivamente de recomodar la información sino de presentar el contenido de manera óptima para el usuario.

Accesibilidad

Es el grado en el que todas las personas pueden utilizar un objeto, visitar un lugar o acceder a un servicio, independiente de sus capacidades físicas, cognitivas y técnicas.

Relacionado a Internet se refiere a qué tan apto se encuentra el contenido de un sitio para ser interpretado por todos los usuarios, independientemente de sus limitaciones fisiológicas y tecnológicas.

Usabilidad

Facilidad con que las personas pueden utilizar una herramienta u objeto fabricado por otras personas
